# ABOUT US

## Introduction

Royal Energy Sarl is a leading player in the global energy sector, specializing in the exploration, extraction, refining, and distribution of oil and gas. With a commitment to providing sustainable and reliable energy solutions, we operate across a diverse portfolio of upstream, midstream, and downstream operations.

Our upstream activities focus on exploring new oil fields and extracting

crude oil and natural gas, while our midstream infrastructure ensures the efficient distribution of gas products. In the downstream sector, Royal Energy Sarl refines crude oil into high-quality petroleum products and distributes them to markets worldwide.

At Royal Energy Sarl, safety, environmental stewardship, and innovation are at the heart of everything we do. We are dedicated to reducing our carbon footprint through investments in renewable energy, advanced technology, and sustainable practices, all while delivering energy that powers the world.

With operations spanning 10 towns in Congo and a workforce of dedicated professionals, Royal Energy Sarl is committed to driving growth, creating value for our stakeholders, and ensuring the responsible development of energy resources for future generations.

# *Our Vision and Mission*

## Our Vision

To provide the best quality products and services at cost effective measures towards customer satisfaction

## Our Mission

To provide best possible services to our customers with understanding the competitiveness involved

# Our Values

Royal Energy SARL typically emphasize on a set of core values that guide our operations and interactions with stakeholders, including employees, communities, investors, and governments.

## 1. Safety

**Commitment to safety:** Prioritizing the safety and well-being of employees, contractors, and the public. Companies aim for zero incidents and continually enhance safety protocols and technologies. **Risk management:** Identifying and mitigating risks in all operations to protect people, the environment, and assets.

## 2. Integrity

**Ethical conduct:** Operating with honesty and transparency, adhering to high ethical standards, and complying with all laws and regulations. **Accountability:** Taking responsibility for decisions and actions, being open and transparent about successes and challenges.

## 3. Environmental Responsibility

**Sustainability:** Reducing the environmental impact by minimizing emissions, conserving

resources, and supporting biodiversity. **Climate action:** Developing cleaner technologies and exploring renewable energy sources, with a focus on reducing carbon footprints and mitigating climate change.

## 4. Innovation and Excellence

**Operational excellence:** Continuously improving operational efficiency, technology, and processes to maximize output while minimizing waste and environmental harm. **Innovation:** Investing in new technologies and approaches, such as digital transformation and renewable energy development, to drive industry progress.

# | WHY ROYAL ENERGY?

## **Safety First**

We Comply to highest and safest standards in the industry

## **Always Operating**

We are available, 365 days a year, to respond to your needs

## **Delivery On Time**

Load and receive your goods whenever needed

## **Process Automation**

We optimize our operations using latest technologies

## **Preserve Goods**

Keep your products in pristine condition with our fuel Quality Assurance Program

## **Minimum Losses**

Save your products from significant losses by storing in our state-of-art terminals

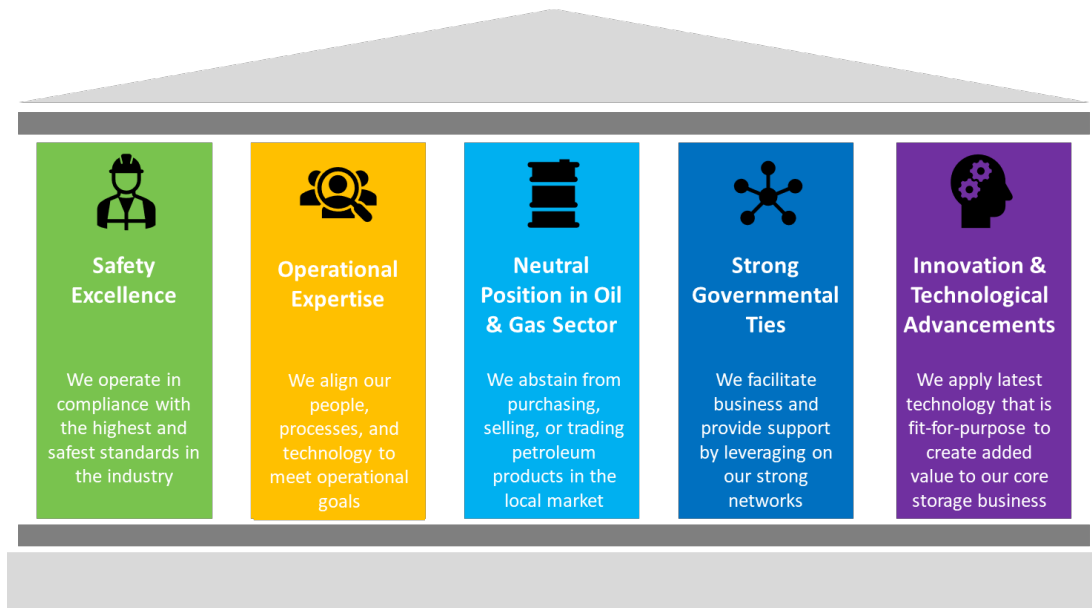

## ROYAL ENERGY DRIVERS

Since our inception, Royal Energy has laid down the five core drivers “5Cs” that shapes the way we conduct business and serve our clients.

## ROYAL ENERGY DIFFERENTIATORS

These competitive advantages have enabled Royal Energy’s business to grow rapidly since its establishment and provide a strong foundation for future growth.

## | OUR SERVICES

### Strategic Stock Management

Store and circulate strategic stock of petroleum products & LPG operating in the Republic of Congo

### Storage & Handling

Storing and loading/unloading of petroleum products & LPG in our terminals

### Transportation

Transporting petroleum products & LPG between our terminals

## | PRODUCTS OVERVIEW

**Diesel**  
EUR3/EUR5

**Gasoline**  
G90/G95

**Jet Fuel**

**Liquefied Petroleum Gas  
(LPG)**

**Heavy Fuel Oil**

**Kerosene**

# Our Products

Royal Energy Sarl engages in exploration, extraction, refining, transportation, and marketing of petroleum products.

## Diesel

We ensure availability, production, and distribution of diesel fuel, a key energy source used in transportation, industrial machinery, agriculture, and power generation. Diesel is a byproduct of crude oil refining, specifically produced during the

distillation process, where it is separated from other petroleum products like gasoline, jet fuel, and kerosene.

## Gasoline

we specialize in the production, distribution, and availability of gasoline (petrol), a refined petroleum product used

*Our sector is a critical component of the global energy supply, providing fuel for transportation, heating, electricity generation, and raw materials for numerous chemical products.*

primarily as fuel in internal combustion engines for vehicles. Like diesel, gasoline is derived from crude oil through the refining process. The gasoline supply chain is global and complex, involving exploration, refining, transportation, storage, and distribution to end consumers.

## Jet fuel

Jet fuel production is a crucial part of the global aviation industry, supplying the energy required to power aircraft engines. Jet fuel is typically derived from crude oil and is refined to meet stringent quality and performance standards for use in commercial, military, and

private aviation. The two main types of jet fuel are Jet-A and Jet-A1, used for turbine-engine aircraft, and JP-8, a military-grade fuel.

We also supply and fit tyres. With every tyre change we also check the balance and offer 4-wheel alignment on our state of the art geometry machine, keeping you safer on the road.

# Our Products

*We specialize in the the exploration, extraction, refining, transportation, and marketing of petroleum products.*

## Liquified Petroleum Gas (LPG)

Whether it's a minor scratch or a major collision, Action Auto Repairs got your back. With our keen eye for detail and unwavering dedication, we have your car looking as good as new in no time. Imagine the compliments you'll

receive as you cruise down the street, turning heads left and right.

## Heavy Fuel Oil

supply involves the production, distribution, and consumption of one of the most commonly used fuels in marine transportation, power generation, and industrial applications. HFO, also known as bunker fuel, is a residual product of crude oil refining and is characterized by its high viscosity and sulfur content. Its use is primarily concentrated in

*We emphasize on a set of core values that guide their operations and interactions with stakeholders, including employees, communities, investors, and governments.*

sectors where cost efficiency is critical, and emissions regulations are less stringent, although this is changing due to environmental concerns.

## Kerosene

Kerosene is a versatile petroleum product with a wide range of uses, especially in areas where its relatively

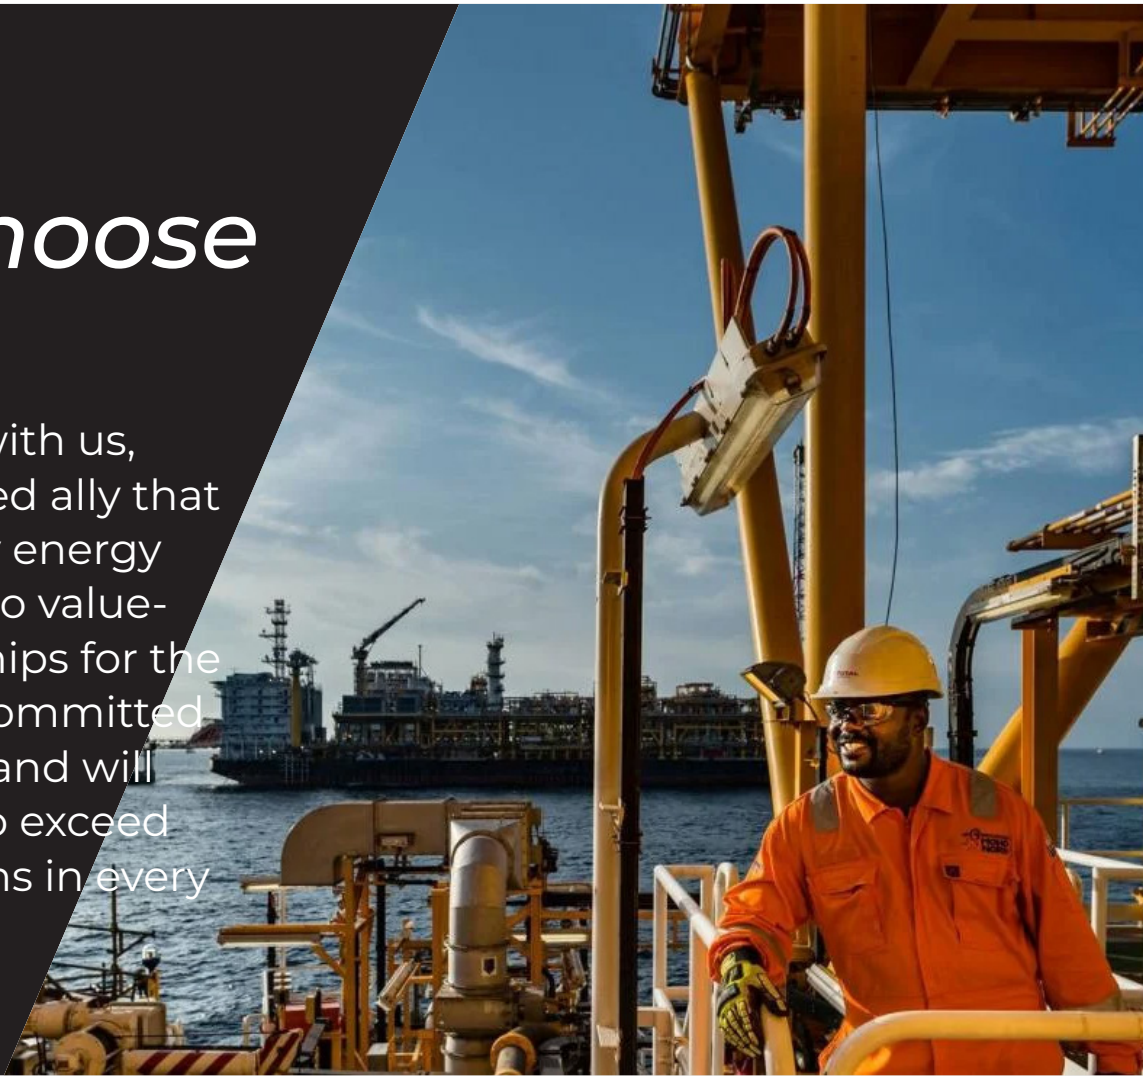

low cost, availability, and energy density make it an essential fuel. It is a middle-distillate fuel derived from crude oil and is often recognized for its use in aviation as jet fuel, but it has many other applications across industries and households.

# Why choose us

By partnering with us, you gain a trusted ally that delivers not only energy solutions but also value-driven partnerships for the future. We are committed to your success and will work tirelessly to exceed your expectations in every endeavor.

## Benefits of working with us

### **Proven Expertise and Experience**

With years of industry experience, our team of seasoned professionals brings extensive knowledge and technical expertise to every project. We have a proven track record in upstream, midstream, and downstream

operations, ensuring high-quality results that meet global standards. Commitment to Safety and Environmental Responsibility

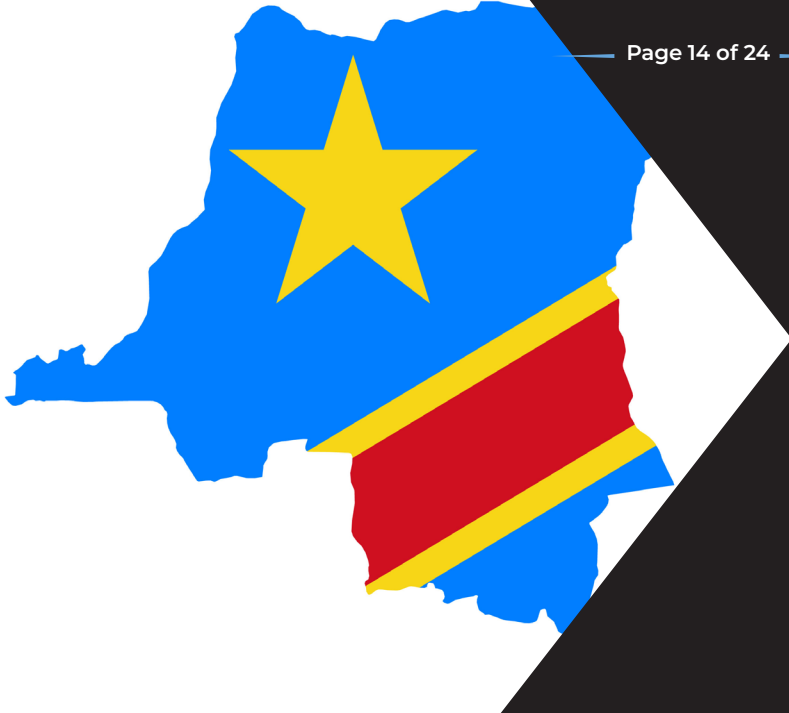

We prioritize safety and environmental stewardship in every aspect of our operations. Our company adheres to the strictest health, safety, and environmental (HSE) protocols, minimizing risk and ensuring

*Experience the ultimate in car care with our top-notch auto repair services!*

compliance with industry regulations. We invest in the latest technologies to reduce emissions and environmental impact, contributing to a sustainable future.

### **Innovative Solutions and Advanced Technology**

In a rapidly evolving industry, we stay at the forefront by adopting the latest technological advancements. From enhanced exploration techniques to digitalized monitoring systems, we leverage cutting-edge solutions to optimize efficiency, reduce costs, and increase operational reliability.

#### **Customized and Flexible Services**

We understand that every client and project is unique. Our approach is highly customized, with flexible

solutions tailored to your specific needs. Whether it's exploration, production, or distribution, we deliver results that align with your business goals.

### **Global Supply Chain and Reliable Logistics**

Our global network ensures that we can source, transport, and deliver oil, gas, and fuel products efficiently and reliably. Our robust supply chain and logistics capabilities mean you can depend on us for timely and consistent deliveries, regardless of location or scale.

### **Cost-Effective Solutions**

We combine our technical know-how with efficient processes to provide

# Our Services

*Our global network ensures that we can source, transport, and deliver oil, gas, and fuel products efficiently and reliably.*

cost-effective solutions. By optimizing resource management, we ensure that our clients receive top-tier services while maximizing return on investment.

## **Commitment to Sustainability**

We are committed to advancing sustainable energy practices. Our investments in renewable energy technologies, cleaner fuel production, and carbon reduction initiatives help our clients achieve their environmental targets while securing long-term energy supply.

Comprehensive Service Offering

From exploration and production to refining, distribution, and beyond,

we offer a complete range of services across the oil and gas value chain. This integrated approach ensures seamless collaboration and streamlined operations, reducing complexity for our clients.

Strong Industry Partnerships

Over the years, we've cultivated strategic partnerships with leading companies across the oil and gas sector. Our vast network allows us to collaborate effectively, ensuring access to the best resources, technologies, and expertise available.

## **Dedicated Customer Support**

We pride ourselves on providing exceptional customer service. Our dedicated support team is available

*We maintain  
a strong local  
presence in key  
markets.*

24/7, offering expert guidance and ensuring that every project runs smoothly from start to finish. We build long-term relationships with our clients based on trust and mutual success.

### **Risk Management and Regulatory Compliance**

Navigating the complexities of the oil and gas industry requires a deep understanding of regulatory frameworks and market risks. Our team is proficient in risk management and ensures that all our projects comply with local, national, and international regulations, protecting your interests at every stage.

Local Presence with Global Reach

While we have a global footprint,

we maintain a strong local presence in key markets. This enables us to understand the unique challenges and opportunities in each region, offering localized solutions backed by global expertise.

By partnering with us, you gain a trusted ally that delivers not only energy solutions but also value-driven partnerships for the future. We are committed to your success and will work tirelessly to exceed your expectations in every endeavor.
